

Your one stop rooftop power solution.

Save upto 50% on electricity bills with
TATA Power Solarroof. Install today.

Save on your energy bills as you save the planet.

TATA POWER
SOLARROOF

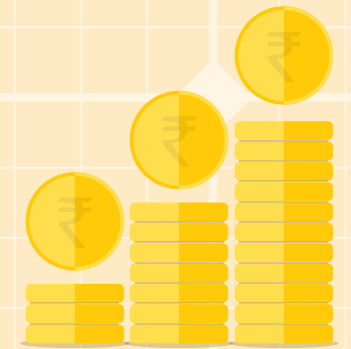

Welcome to a world of benefits

The best choice for residential customers who are looking to save some money and MSMEs looking to improve their bottomline, Tata Power Solarroof offers solutions to fit every need and every budget, with a world of financial benefits.

Save money.

- ◆ Savings of about ₹10 lakhs for residential customers*
- ◆ Savings of about ₹2 Crore for MSMEs customers*
- ◆ Pay Back period of 4-5 years
- ◆ Grid independence against rising electricity tariffs

Save the world.

- ◆ For MSMEs – Equivalent to planting 5000 trees#
- ◆ For Residents – Equivalent to planting 250 trees#
- ◆ Green Building Certification

Save your worries.

- ◆ Minimum maintenance
- ◆ Scalable design for future expansion
- ◆ Up to 40% accelerated depreciation benefit for MSMEs

Disclaimer:

*Calculated for 25 years, for 100 kW system for MSMEs, institutions, and 5 kW system for residential. Electricity tariff calculated @ ₹7.2 / unit

#Mentioned for 100 kW system for MSMEs and 5 kW system for residential, over a 25-year lifetime. (Source: MNRE Website)

At TATA Power Solarroof, we have a range of solar system options to suit every requirement of our discerning customers. But no matter what you choose, you can rely on TATA Power's exemplary service and maintenance commitment.

Know your Solar

The workings of a solar module:

- Made of Silicon wafers, a semiconductor
- Photons from the sun knock out electrons
- Direct Current electricity flow is established

Determine your requirement

Calculated as capacity needed and capacity that can be installed:

Capacity Needed

- As per load requirement / quantum of electricity bill
- Varies from state to state for the same electricity bill

Capacity that can be Installed

- Shadow free space available: Typically, 1 kW system requires 100 sq ft of shadow free space
- Sanctioned load: A limit on capacity varies from state to state

A typical 1kW system

produces
~120 units
electricity /
month

required
for ~ 1000
electricity
bill / month

requires
100 sq ft of
shadow
free space

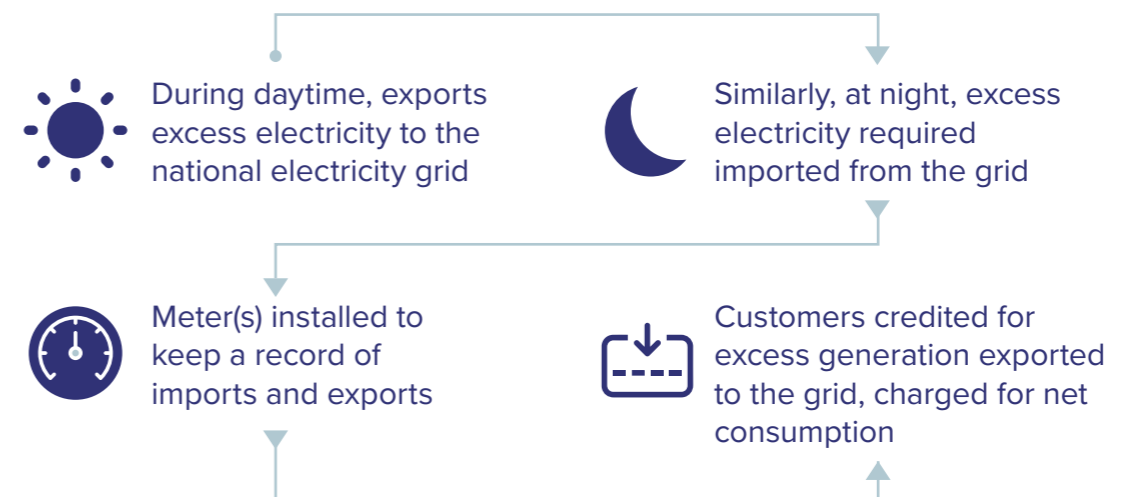

Types of Solar Systems

Grid connected-
no generation
during grid
outage

Battery equipped-
provide backup and
generate during
grid outage

The working cycle of Tata Power Solarroof

Choose The Best, Choose Tata Power

You've already made the smart decision of going solar. Now make a smarter one by choosing the best solar rooftop solution- Tata Power Solarroof.

1

SCALE AND EXPERIENCE WORTHY OF COMPLETE TRUST

30,000+ total & 15,000+ residential customers

Awarded No 1 Solar EPC Player for 6 years in a row

30+ years' experience, 500+ MW installed

Pan India network of 250+ Channel Partners

3

UNPARALLELED SERVICE

Supply of complete Bill of Materials

Easy Financing Solutions

I&C, including liaising for regulatory Approvals

Allied Needs: Home Automation, Generation Data, PV Insurance

2

HIGHEST QUALITY PRODUCTS WITH TECHNOLOGICAL SUPERIORITY

World Class Engineering & Installation on account of long experience in Solar

Higher plant uptime due to Lifecycle Service and Support: Extensive Service Network

Best quality solar panels – robust purchase process

4

STRINGENT SAFETY STANDARDS

Use of STAAD certified structures designed to withstand high wind-speed conditions

To eliminate any possibility of an accidental mishap, all metallic roof installations fitted with walkways and safety lines.

Choose what suits you

At TATA Power Solarroof, we have a range of solar system options to suit every requirement of our discerning customers. But no matter what you choose, you can rely on TATA Power's exemplary service and maintenance commitment.

GRID CONNECTED SYSTEM

Suitable for: All customers with shadow-free roof / ground

Product range: 1 kW to multiple mWs

Features:

- Best quality panels
- Inverters & other components for max generation
- Design life
- Remote monitoring on mobile & web

BATTERY BASED SYSTEM

Suitable for: Homes, offices, industries with problematic grid reliability

Off-grid systems: Power critical lighting loads, without grid export functionality

Hybrid systems: Power-heavy load, export excess generation to grid & can complement DG sets

Variants:

Lead acid batteries / Li-ion batteries

Features:

- Advance battery protection logic

MICRO INVERTER-BASED GRID CONNECTED SYSTEM

Suitable for: Villas & Bungalows

Flexibility: Suitable for different tilt and azimuth angles

Features:

- Module level MPPT and monitoring: higher yield in cases of partial shadow, soiling

Safety Features:

- No aggregation of Direct Current on roof

SOLAR TREE

Suitable for: Villas, Industries (Lawns), Housing societies, schools & resorts

Variants: 10 module & 16 module

Dimensions: 7m (L) x 7m (W) x 4.5m (H); 2.5m clear distance from ground

Features:

- Simple modular design
- Tubular steel structure

SOLAR ARTEFACTS

Suitable for: Villas, housing societies, resorts, roof-top sitting areas

Variants: 18 modules (6*3) array configuration

Dimensions: 6m (L) x 6m (W) x 3.5m (H); 2.5m clear distance from ground

Features:

- Multiple designs
- Tubular steel column & trusses

SOLAR BALCONY

Suitable for: Apartments, Commercial Buildings

Variants:

- Battery storage / Micro-inverters

Features:

- Solar power benefits even without roof space

TATA Power has various financing tie-ups to facilitate easy loan approvals and disbursements, providing an additional benefit of customers not having to utilize their existing credit limits with their banking partners.

Financing Partners

Going Solar has never been easy and affordable

Attractive financing schemes for our rooftop customers. Take the right step into the world of Solar Power Solutions with our Hassle-free and Easy Financing Schemes for both Residential Customers as well as SMEs and Corporates.

Smart Financing Schemes for Powering Your Business

CAPEX Financing

- Low Interest Rates.
- Minimum Documentation.
- No Collaterals.
- Quick Processing Speed.
 - CAPEX through PSUs and NBFCs
 - Key Features: 5-15 years tenure, 25-30% down payment, ROI-7.5-14%
 - Usually, collateral required from 25-50%
 - Collateral-free option also available under an exclusive scheme for Tata Power customers.

OPEX Financing

- Pay-as-you-go (PPA)
- Financial Lease
- Operational Lease.
 - Zero or minimal upfront payment.
 - Savings from Day 1: Monthly outflow much less than regular electricity bills.
 - Tenure: 5-25 years,
 - Asset can be in own name or financier's name.
 - No hassles of plant maintenance or insurance.

Smart Financing Schemes for your Home

Invest in solar with Rooftop Solar Finance Scheme for smart homes. Go Solar- Pledge for a cleaner and greener environment.

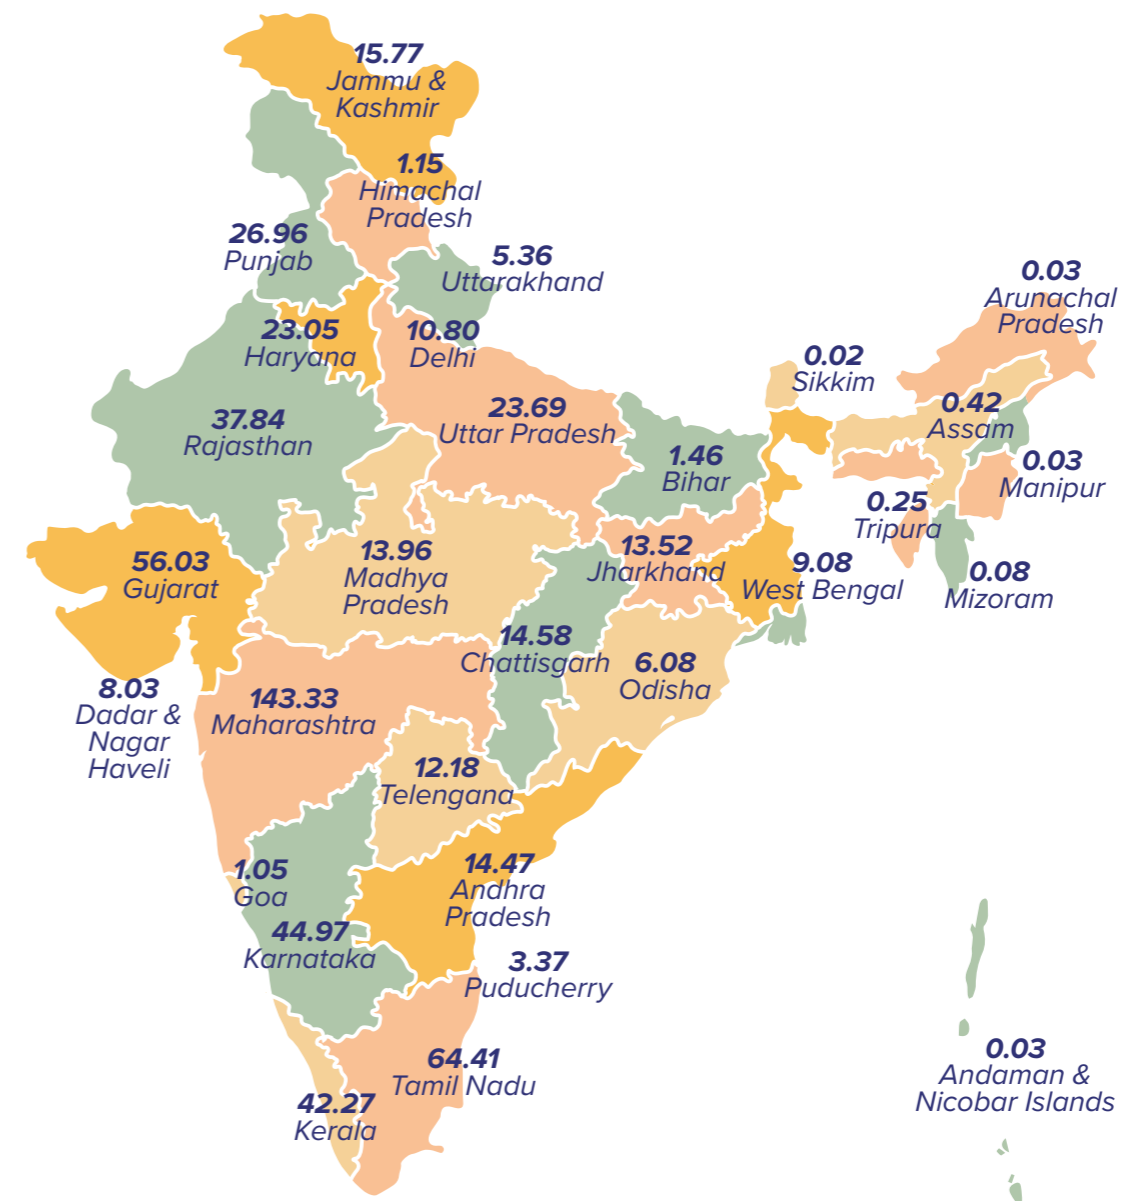

- Instant EMI options.
- Minimum Documentation.
- No Collaterals.
- Low Interest Rates.
- Doorstep Services.

TATA Power's Solar Rooftop

CLIENT	CAPACITY	LOCATION
RSSB-EES	16 MW	Amritsar, Punjab
